

RMPP375 NATURAL

RMPP375 Natural is a Polypropylene (PP) Compound specifically developed for rotational molding to provide good light diffusion and translucency in lighting covers.

It also provides a bright clean surface for furniture adornments e.g. planters, vases, lighting features, etc.

All ingredients used in the manufacture of this proprietary compound conform with the approved list of chemicals in U.S. 21 CFR F.D.A. Regulation Part 177.1520 Clause 3.1a.

Available as powder.

FEATURES:

- **A good balance of cleanness and translucent properties**
- **Good Temperature Resistance (dry & wet)**
- **Better Flexural modulus than LLDPE**
- **Rated > UV12**
- **Improved surface hardness and scratch resistance**

PROCESSING GUIDELINES:

- Oven temperature ~ 280°C to 300°C
- PIAT 220°C – 230°C
- Rotation similar to LMDPE

OBSERVATIONS:

- Lower shrinkage than LLDPE, typically 1.5%
- It has excellent processability
- The translucent surface highlight special effects when using coloured LED globes
